

ICEBUG®

FALL
WINTER 2026

PRODUCTS

Superior traction. Built to last. Business as a force for good.

Acceleritas 9 RB9X™

A minimalist, lightweight running shoe with maximized ground contact and traction.

The new generation of Acceleritas is here, designed for minimalism enthusiasts and a must-have for the adventurous runner who loves running beyond forest trails. The very durable upper fabric is called Perspair®, a woven fabric made with a Jacquard technique that is designed to reduce seams. It combines several yarns, such as a super strong aramid fiber. The upper is very smooth and has a very low wet weight thanks to the minimal water pickup. The heel section is very soft and comfortable to reduce pressure on the Achilles tendon. The last has a regular fit with a slightly roomier toe box. The outsole features an aggressive tread pattern that channels dirt diagonally to the sides, inspired by tractor tires. Icebug's innovative rubber compound RB9X™ delivers outstanding traction on wet and dry surfaces without compromising durability.

DETAILS

UPPER PART	Perspair®, a woven Jaquard fabric made of yarns from recycled Nylon, PU and Aramid.
LACING	Classic shoelaces
LINING	Partially lined with bluesign®, 100% recycled, bluesign® and solution dyed, GRS certified PET polyester
INSOLE	BLOOM® foam EVA, lined with bluesign®, solution dyed textile made from 100% recycled GRS certified PET polyester textile. Removable.
MIDSOLE	Lightweight EVA with 20% BLOOM® Foam, Rock Shield
OUTERSOLE	RB9X™ non-studded traction rubber
LAST	Regular
DROP	4 mm
TORSION	Easy flex
CUSHIONING	Responsive

SUSTAINABILITY

Midsole EVA contains 20% BLOOM® foam, made with algae harvested from waterways with dense algae growth.

The Milspeed inner heel and toe reinforcements are made of 60% recycled plastic, out of which 11-12% are recycled nylon fishing nets.

The RB9X™ outsole contains 26% natural rubber and 15% recycled rubber.

Arcus 2 BUGrip® GTX

Running shoe with superior comfort and studded traction on all winter roads.

Arcus 2 BUGrip® GTX can withstand tough weather thanks to the waterproof GORE-TEX® ePE Invisible membrane. The membrane is integrated with the upper material, making it even softer and more comfortable than a traditional membrane bootie construction. Arcus 2 is equipped with a nitrogen-infused SuperC midsole, providing an incredibly comfortable running experience that lasts over time. The sole is very light and designed to reduce pressure on the forefoot and heel while driving you forward, resulting in a smooth stride. The latest midsole technology gives great comfort on longer runs while providing high responsiveness in every step. The BUGrip® outsole has thirteen dynamic studs that provide reliable traction on all winter surfaces.

DETAILS

UPPER PART	Bluesign® PET polyester, 100% recycled and GRS certified
LACING	Classic shoelaces
LINING	GORE-TEX® Invisible Fit, with Oeko-Tex 100 lining
INSOLE	OrthoLite® Hybrid™, lined with 100% recycled GRS certified PET polyester, which is bluesign® certified and solution dyed. Removable.
MIDSOLE	SuperC Foam™, Nitrogen infused EVA
OUTERSOLE	Rubber with BUGrip® carbide steel tip studs
LAST	Wide
DROP	6 mm
TORSION	Stability flex
CUSHIONING	Full

SUSTAINABILITY

GORE-TEX® ePE membrane is PFC free and has reduced carbon footprint.

The GORE-TEX® lining is bluesign® certified and meets the STANDARD 100 by OEKO-TEX®.

SuperC Foam™ midsole technology uses less chemicals than normal EVA midsoles.

Arcus 2 RB9X™ GTX

Running shoe with superior waterproof comfort and great non-studded traction.

The Arcus 2 is the perfect shoe for long runs on gravel and trails. The shoe protects against wet weather thanks to the waterproof GORE-TEX® ePE Invisible membrane integrated into the upper, making it even softer and more comfortable than previous versions. This shoe is ideal for those who want extra cushioning, whether for longer runs, recovery runs, or running with a backpack. Arcus 2 is equipped with a nitrogen-infused SuperC midsole, providing an incredibly comfortable running experience that lasts over time. The sole is very light and designed to reduce pressure on the forefoot and heel while driving you forward, resulting in a smooth stride. The latest midsole technology gives great comfort on longer runs while providing high responsiveness in every step. The RB9X™ outsole provides grip on both dry and wet surfaces, making the Arcus 2 the perfect running shoe in most weather conditions.

Järv Gaiter BUGrip® GTX

Light, studded, cushioned and waterproof running shoes for all winter conditions.

Järv Gaiter BUGrip® GTX is Icebug's most equipped winter running shoe, providing shelter and confidence to go out in all possible conditions. The upper is made of a woven Jacquard polyester that is very durable and light, ensuring that the feet feel agile and free with every stride. Topping it off, a stretchy collar extends up like a gaiter to keep snow and cold out. Laminated TPU mudguards protect when running in tricky terrain and the waterproof GORE-TEX® Invisible Fit keeps the feet dry. The Invisible Fit also ensures a high level of comfort compared to the traditional bootie construction used for membranes. Järv's intelligently designed last features a narrow heel for stability and ample toe space for comfort on extended outings. The midsole offers a great combination of cushion and stability to manage tricky terrain comfortably. Made partially of Susterra bio-based material (corn), it gives an energetic rebound at every step. With a 4mm drop, the Järv hits the sweet spot for versatility, tackling a multitude of surfaces with ease. The BUGrip® outsole has 18 carbide tip steel studs that provide superior traction in icy conditions and make it possible to run confidently all winter long.

DETAILS

Järv RB9X™

Light and cushioned running shoe for longer trail runs on mixed surfaces.

The world is your playground in the Järv, a trail running shoe from Icebug. Unleash your potential on long-haul runs across winding trails with mixed surfaces. The thin, lightweight woven engineered upper combines durability with smoothness, ensuring the feet feel agile and free with every stride. Järv's intelligently designed last features a narrow heel for stability and ample toe space for comfort on extended outings. The midsole offers a great combination of cushion and stability to manage tricky terrain comfortably. Made partially of Susterra bio-based material (corn), it gives an energetic rebound at every step. With a 4mm drop, the Järv hits the sweet spot for versatility, tackling a multitude of surfaces with ease. The aggressively lugged outsole features the renowned Icebug traction benchmark RB9X™ compound, made with a mixture of recycled and natural rubber, so you'll grip, glide, and embrace any challenge that comes your way. Järv is a true passion project created by runners for runners.

Myr BUGrip®

A true comfort driven winter running shoe that provides great stability and feeling on icy roads and packed snow.

Myr BUGrip® is a studded winter running shoe that provides great stability and feeling on icy roads and packed snow. The upper is made of a Double Jaquard polyester that is very durable and light, it's also the kind of upper that provides a soft and comfortable feeling and elevates the high level of comfort. The toe has a laminated mudguard extending over the big toe area to provide extra protection and longevity. The last is regular with a snug fit over the foot and in combination with the great fitting heel the foot is kept in place. A roomy toebox is just what toes prefer to stay warm on cold winter runs. The fully cushioned midsole has an eTPU compound, giving great comfort and a plush running feeling. The 8mm drop hits the sweet spot for what many heel to mid-foot strikers prefer. The studded BUGrip® outsole provides traction in all winter conditions but behaves completely civilized when running on asphalt.

DETAILS

UPPER PART	Double Jaquard with 50% Polyester, 42% recycled Polyester, 8% Monofilament Polyester
LACING	Classic shoelaces
LINING	Ocean RePET polyester. 100% recycled, bluesign®, solution dyed and OBP certified
INSOLE	SuperC Foam™, lined with 100% OBP certified Ocean RePET polyester. Removable.

Myr RB9X™

Trail running shoe made for recreational runners that train for a healthy lifestyle.

Myr is a lightweight and well-cushioned trail running shoe that is made for recreational runners that train for a healthy lifestyle. It's a great choice for someone who wants to run on a mix of surfaces, since it works well on gravel and hard ground without compromising grip. The upper is made of a light and breathable Engineered Jaquard mesh to elevate both performance and comfort. The toe has a laminated mudguard extending over the big toe area to provide extra protection and longevity. The high-stacked midsole is made of an eTPU compound and it balances responsiveness and cushioning perfectly. The eTPU is lighter than traditional EVA but still performs better over time. The 8mm drop, together with a great roll, aim at all mid-foot and heel strikers that look for comfort, and the padding and last are both designed to maximize running experience on longer runs. Completed with Icebug's grippy RB9X™ rubber compound and traction pattern, the runner can relax also in rocky terrain even if it's raining.

DETAILS

Pytho 7 BUGrip®

Pytho BUGrip® is a studded running shoe with high comfort and excellent ground contact. Be it on slippery trails or an icy road; Pytho delivers traction and running joy all year-round.

Pytho 7 BUGrip® has everything loved by year-round runners; medium drop, spacious toe box and good protection in rough terrain. The woven engineered upper is very light and durable and the laminated TPU mudguard protects the toes when the going gets tough. The tongue only has a thin padding to enhance the direct feeling. The midsole has a 40% biobased sugarcane content and provides a great mix of torsional rigidity and toe flex, which in practice means support in technical terrain and superb ground control when increasing the speed. The 10mm drop hits the sweet spot for this kind of multi-usage shoe. The studded BUGrip® sole is backed up by deep rubber lugs which means benchmark traction on all wet and icy surfaces met on the daily workout.

DETAILS

UPPER PART	Woven engineered upper made of 50% RePET polyester, 50% eTPU. Laminated TPU mudguard.

Spirit 9 OLX

This is the benchmark off trail and orienteering racing shoe worn by orienteering champions since 2009.

Spirit has been a favorite for many years and remains the top choice for orienteers and off-trail runners, whether world champions or amateurs. The key to Spirit's success lies in the combination of low weight, flexibility, and traction without compromising durability. The very durable upper fabric is called Perspair®, a woven fabric made with a Jaquard technique that is designed to reduce seams. It combines several yarns, such as a super strong aramid fiber. The upper is very smooth and has a very low wet weight thanks to the minimal water pickup. The heel section is specially designed to relieve pressure on the Achilles tendon. Spirit features a low-profile sole with a 4mm drop for maximum ground control and a flexible midsole that allows the foot to move naturally. The last was updated a few seasons ago and offers a slightly roomier toe box. The outsole provides outstanding traction with an innovative tread pattern inspired by tractor tires and 14 fixed OLX studs made of carbide steel.

DETAILS

UPPER PART	Perspair®, a woven Jaquard fabric made of yarns from recycled Nylon, PU and Aramid.

Rover 2 Mid BUGrip® GTX

Mid-cut hiking shoe that is both studded and waterproof and handles all winter conditions.

Rover Mid is a smart investment for those seeking waterproof shoes for brisk walks all winter long. Whether hiking on uneven ground or icy trails, these boots are built to keep you steady and comfortable every step of the way. Mid-cut design provides optimal ankle support and comfort, while maintaining flexibility for natural movement. Rover 2 Mid is not only comfortable and lightweight, but also waterproof thanks to the PFAS-free GORE-TEX® ePE membrane. The strong recycled ripstop material made by CORDURA® will protect the feet from external elements, like sticks and rocks. Thanks to the BOA® Fit System, this hiker is easy to slip in, tighten and get ready to explore nature. The BUGrip® outsole features dynamic studs for reliable traction on all types of winter surfaces.

Haze RB9X™ GTX

Haze RB9X™ GTX is a lightweight shoe for all weathers. It offers multi usage, from trail to speed-hiking and city walks.

The Haze RB9X™ GTX is fully packed with features. The GORE-TEX® membrane offers comfortable waterproofness. The BOA® Fit System provides a perfect, precision fit - all day long. It delivers more connectivity and stability and is built to perform in any environment. Haze has torsion stability and good cushioning. It's featured with protective lamination all around the foot to protect against abrasion in tougher terrain. The collar and tongue have comfortable padding. With the RB9X™ rubber it performs on both dry and wet surfaces and together with the design of the outsole it provides reliable traction in various outdoor terrains.

Hede BUGrip®

A waterproof winter walking shoe with a studded outsole that provides confident traction on icy surfaces.

Hede BUGrip® is built for long, comfortable speed hikes and walks across all kinds of winter terrain and in any weather. The upper is made from durable ripstop polyester, and combined with the waterproof BUGdri® membrane, it keeps your feet dry and comfortable in everything from rain to slush. The elastic quicklace system is both convenient and allows for easy, on-the-go adjustments to the fit. The cushioned midsole offers excellent rebound and performs on par with any modern lightweight EVA, with the difference that it's made with 40% bio-based sugarcane for a more sustainable footprint. High torsional rigidity provides stability, and the studded BUGrip® outsole ensures confident grip on any slippery winter surface.

DETAILS

UPPER PART	Polyester mesh, laminated TPU mudguard, eyestay and heel part is made of microfiber.
LACING	Elastic Quicklace
LINING	Ocean RePET polyester. 100% recycled, bluesign®, solution dyed and OBP certified
INSOLE	OrthoLite® Hybrid™, lined with 100% recycled GRS certified PET polyester, which is bluesign® certified and solution dyed. Removable.

Moen BUGrip®

A stylish, studded mid-cut sneaker that perfectly combines aesthetics and performance.

Moen strikes the perfect balance between performance and urban design. This mid-cut sneaker keeps your feet protected from harsh winter conditions, thanks to its water-repellent upper and cozy fleece lining. But beneath the casual exterior lies a running shoe platform designed to keep your feet energized even on long walks, with top-notch cushioning and a smooth toe-off. The studded BUGrip® outsole delivers confident traction on ice and snow, while still feeling perfectly at home on pavement and other urban surfaces.

Aura ReWool RB9X™

The perfect summer walking shoe, with a light airy upper and top-notch comfort.

Wearing Aura ReWool is like walking on clouds, with its full cushion and low weight. The aim when designing the shoe has been to maximize the usage of natural materials. Wool is great when it comes to create a good foot climate and especially when the entire upper is designed as a one layer engineered knit to keep it as airy and thin as possible. The upper material consists of 50% ReWool in the upper, as recycled wool has a far lower impact on the environment than what virgin wool has, but in order to give the shoe an abrasion resistance it is mixed with 50% recycled polyester. The fully cushioned midsole is made of our latest midsole technology SuperC Foam™. Compared to a traditional EVA midsole this Nitrogene infused EVA midsole is lighter, softer, more resilient, has a higher energy return and a lower climate impact. The removable insock is lined with recycled felted wool from Woolpowers production. The RB9X™ compound provides reliable traction in both dry and wet conditions. Aura ReWool is the perfect summer lifestyles and walking shoe.

A super comfy and warm boot with clean, casual Icebug aesthetics.

An everyday lifestyle boot! Water repellent Suede leather upper with a mudguard that keeps slush out and waterproof BUGdri™ membrane keeps the feet dry. The Primaloft® Bio insulation and fleece lining keeps the feet warm and together with the roomy last and toe box a healthy foot climate is created. The midsole stability and roll have excellent walking properties. The non-studded Nordic Traction™ outsole rubber keeps its excellent properties also in low temperatures, when normal rubber stiffens and makes winter hiking comfortable.

Cortina W BUGrip®

Sleek winter boot with high shaft, fleece lining and studded outsole.

Cortina is the perfect winter combination of function and fashion! The lightness and free feeling of a featherweight sneaker together with the comfort and warmth of a reliable winter boot. The Rip stop polyester of the upper is not just light and water resistant but also very easy to maintain. The high shaft has a long medial zipper to allow easy entrance and a fleece lining that keeps the foot warm even on cold mid-winter days. The midsole is well-cushioned, and the last is wide, ensuring happy feet even during longer walks. Carbide studded BUGrip® outsole provides traction and confidence on icy spots but walks completely civilized on pavement and other surfaces.

Eli RB9X™

An elegant and minimalistic summer shoe with a stylish, airy upper and some state of the art comfort.

Eli is perfect for summer walking and living, combining the airiness of a sports sandal with the casual sportiness of a great looking sneaker. Engineered mesh upper keeps the feet cool on summer days. Ergonomically shaped last, memory foam insock and midsole roll for superb foot health. Well-cushioned BUGforce™ midsole results in a soft impact and an approximately 50% better energy return than a standard EVA foam midsole. Elastic cord instead of regular lacing provides an easy on and off feature. The RB9X™ outsole provides traction on Sunday strolls and downtown walks.

Ivalo4 BUGrip®

Ivalo BUGrip® is a durable and comfortable winter boot with warm insulation and studded BUGrip® traction.

Ivalo BUGrip® is one of the all-time Icebug best-sellers. This version has seen some upgrades but is still as convenient and light as ever. The upper is quilted RipStop with good water resistance. The insulation layer is made of 100% recycled polyester. Ivalo is protected from snow and slush by the mudguard that wraps the whole lower footpart of the boot. Weather resistant front zipper makes Ivalo easy to put on and off. ESS stabilizer and lots of forefoot rocker gives stable platform for fast and healthy feet. Wide ergonomic last. Outsole with dynamic carbide tip studs gives confidence on ice but walks completely civilized on pavement and other surfaces.

Kaipa RB9X™

Kaipa RB9X™ is a light and super comfortable shoe for an active lifestyle on long summer days.

Step into the future of urban exploration with the Kaipa RB9X™; a lifestyle shoe with a dynamic mix of comfort, style, and performance to keep up with a fast-paced lifestyle. Whether dashing through city streets, strolling in the park or spending the full day on a boat, Kaipa is the ultimate companion. This shoe is an athletic version of the famous Icebug Eli. Designed to adapt to the natural movement of the foot, the flexible sole ensures a cushioned stride that minimizes fatigue, even after hours of wear. Weighting in at just a fraction of traditional sneakers, Kaipa is engineered with a lightweight and breathable upper to prioritize agility and movability. The elastic quicklace is both convenient and enables swift fine tuning of the fit when needed. The midsole compound is boosted with BUGforce, giving cushy comfort and energy return for long walks. RB9X™® outsole provides reliable traction on wet asphalt and tiles.

DETAILS

Mosi RB9X™ GTX

A waterproof, lightweight and flexible sneaker with an elastic quick-lacing system for easy on and off.

Smooth feeling but with a last made for walking, that's what you get with the Mosi RB9X™ GTX! The upper is soft and minimalistic and made in a recycled knitted engineered mesh. Elastic quick lacing makes the handling easy and Mosi GTX is always ready to come with you on long walks and in the everyday life. The GORE-TEX® membrane makes this the perfect three-season everyday activity shoe protecting feet from autumn rain and spring drizzle. Despite the addition of the waterproof construction, the shoe is still very light and smooth. However, the super comfortable BUGforce™ midsole delivers support and cushioning that make the walking experience great! The wider midsole, combined with an outsole design with lots of contact areas, gives fantastic traction properties for all surfaces in or outside the city. The RB9X™ compound delivers reliable traction on a multitude of surfaces, from wet city streets to sun-drenched seaside cliffs.

Norna RB9X™

A versatile sneaker with a comfort level that makes it enjoyable for long walks and outings.

Norna is a versatile sneaker made for the everyday life for those with an active lifestyle. As with all Icebug sneaker models, Norna comes with great comfort and rebound. This is a shoe you can walk with for many hours and still have fresh feet and legs at the end of the day. The upper material is water-repellant yet breathable and made from nubuck leather, suede leather, and recycled CORDURA® polyester. The soft lining is made of Ocean RePet polyester and both the tongue and heel collar have a soft padding. The elastic cord provides an easy on and off feature. Norna has an RB9X™ outsole that contains both recycled and natural rubber. It provides traction so you can walk safely on wet and slippery surfaces such as rocks and boat decks. It is an excellent shoe for daily strolls, yet technical enough for forest outings.

Torne 2 BUGrip® GTX

A warm, well-insulated, and waterproof winter boot for cold days out in the snow. Comes with dynamic steel studs for good traction even on the slipperiest surfaces.

Torne 2 BUGrip® GTX is the latest version of our warmest winter boot. This is a laced boot with a high and stable shaft. It has a warm lining and a waterproof GORE-TEX® membrane. The insole is a thick wool sole that keeps feet warm during normal activity, even at very low temperatures. The upper is made of a combination of suede and RipStop polyester, and a mudguard runs around the entire shoe, providing extra protection and extending the boot's lifespan. The BUGrip® model is equipped with 14 dynamic BUGrip® studs made of carbide steel, offering best-in-class traction on wintry surfaces.

HEAT RATING WARMEST

DETAILS

UPPER PART	Suede leather (LWG gold-rated) and Ripstop polyester, bluesign® and solution dyed recycled PET textile. Protective TPU mudguard
LACING	Classic shoelaces
LINING	GORE-TEX® Insulated comfort

Torne 2 NT™ GTX

Torne is aimed at people looking for a warm, insulated, and waterproof winter boot for cold days out in the snow.

Torne is the warmest shoe in the Icebug collection. The high shaft is insulated with wool and has a waterproof GORE-TEX® membrane. It provides stability and shelter from cold conditions and together with the thick wool-lined insole it will keep feet warm in very low temperatures during normal activity. The upper is made of Suede leather and Ripstop Polyester and has a PU mudguard around the shoe to give extra durability and protection. Full front lacing provides easy access and fit adjustment. The non-studded Nordic Traction™ outsole rubber keeps its excellent properties also in low temperatures, when normal rubber stiffens and makes winter hiking comfortable.

Valda NT™

The perfect autumn and winter boot for enjoyable city walks.

Valda is inspired by the iconic Icebug boot Banff and it combines the Scandinavian timeless design from back then with lighter and more sustainable materials of today. The perfect autumn and winter boot for enjoyable city walks. The recycled ripstop polyester upper has a waterproof BUGdri™ membrane and a thin comfortable fleece lining. A medial zipper, lateral elastics and double pull loops makes Valda easy to take on and off. The BUGforce™ midsole is high stack and insulates from ground cold, plus gives an excellent rocker roll for very comfortable walks. The non-studded Nordic Traction™ outsole has deep lugs, both providing a rugged look and awesome grip on pavements, city squares and gravel roads.
